

# MFS MERIDIAN<sup>®</sup> FUNDS — GLOBAL TOTAL RETURN FUND (Class A1USD)

a sub-fund of MFS Meridian Funds

This fund is managed by MFS Investment Management Company (Lux) S.à r.l.  
ISIN: LU0219441499

## KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## OBJECTIVE AND INVESTMENT POLICY

### Objective

The fund's objective is total return, measured in U.S. dollars.

### Investment Policy

The fund invests in a combination of equity securities and debt instruments of issuers located in developed and emerging market countries. Historically the fund has invested approximately 60% of its assets in equity securities and 40% of its assets in debt instruments, but these allocations may vary generally between 30% and 75% in equity securities and 25% and 70% in debt instruments. The fund generally focuses its equity investments in larger companies it believes to be undervalued compared to their perceived worth (value companies). The fund generally focuses its debt investments in corporate, government, and mortgage backed debt instruments. The fund invests substantially in investment grade debt instruments. The fund may use derivatives for hedging and/or investment purposes but will not primarily use derivatives to achieve the fund's investment objective.

### Distributions

Income will not be distributed to shareholders but reflected in the assets of the fund.

### Redeeming Shares

You may sell your shares on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading.

### Terms to Understand

**Equity securities** represent an ownership interest, or the right to acquire an ownership interest, in a company or other issuer.

**Debt instruments** represent obligations of corporations, governments, and other entities to repay money borrowed.

**Derivatives** are financial contracts whose value is based on the value of one or more underlying indicators or the difference between underlying indicators.

## RISK AND REWARD PROFILE

This rating system is based on how much the returns of the class have varied over the past 5 years compared to the fund's current asset mix. Where 5 years' performance history is not available the data consists of historical returns representative of the fund, benchmark returns or returns for another class with the same currency as appropriate. Past returns may not be a reliable indicator of the future risk and reward profile of the class, and the rating may change over time based on the more recent returns. A fund in the lowest category does not mean a risk-free investment.

### Lower risk

Typically lower rewards

The fund is in category 4 because there has been medium fluctuations in the fund's return historically.

### Higher risk

Typically higher rewards

**Equity Risk:** Prices of equity securities can vary significantly in response to issuer, market, economic, industry, political, and regulatory conditions. This risk may be higher where the fund invests in a specific country or region. The fund invests in larger value companies, which may underperform the broader market over time.

**Debt Instruments Risk:** Prices of debt instruments can vary significantly in response to changes in interest rates and the credit quality of the issuers of

its investments, and to issuer, market, economic, industry, political, and regulatory conditions. In addition, the prices of mortgage-backed instruments can vary in response to changes in the credit quality of underlying mortgages and the timing of payment of principal and interest.

**Emerging Markets Risk:** Emerging markets can be more volatile and less liquid than more developed markets.

**Currency Risk:** Changes in currency rates can significantly affect the value of your investment.

**Derivatives Risk:** Derivatives can be highly volatile and can involve leverage. Gains or losses from derivatives can be substantially greater than the derivatives' original cost.

### Other Risks

The rating does not reflect the risk that these factors, as well as other factors such as liquidity, counterparty, and operational risks change over time and can affect the fund's returns differently in the future.

The fund may not achieve its objective and/or you could lose money on your investment in the fund. For more information about the fund's risks, please see "Fund Profiles" and "Risk Factors" in the prospectus.

## CHARGES

You pay the following costs for the marketing, distribution, and operation of the fund. These charges reduce the value of your investment.

**One-off charges taken before or after you invest**

Entry charge.....	6.00%
Exit charge.....	1.00%

This is the maximum that might be taken out of your money before it is invested and before the proceeds of your investments are paid out.

**Charges taken from the fund over a year**

Ongoing Charges.....	1.92%
----------------------	-------

**PAST PERFORMANCE**

Past performance is not a guide to future performance. Performance shown takes into account ongoing charges but not entry and exit fees, if any, and is calculated in U.S. Dollars.

**Charges taken from the fund under certain specific conditions**

Performance fee.....0.00%

The entry and exit charges shown are the highest possible charges you would pay. Please consult your financial intermediary to find out your actual charges which might be less.

The ongoing charges figure shown here is based on annualised expenses for the six month period ended 31 July 2015. Ongoing charges may vary from year to year. For more information about the fund's expenses, please see "Fund Profiles" section in the prospectus, which is available at [meridian.mfs.com](http://meridian.mfs.com).

The fund was launched in 2005
