

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Emerging Markets Equity Fund - A

ISIN: LU0073229840, Base Currency: USD

A fund of Morgan Stanley Investment Funds

The fund is managed by Morgan Stanley Investment Management (ACD) Limited, part of the Morgan Stanley group.

OBJECTIVES AND INVESTMENT POLICY

Objective

- Long term growth of your investment

Main Investments

- Company shares
- At least 70% of the fund's investments

Investment Policy

- The fund will primarily invest in companies based in or carrying out most of their business in emerging market countries. The fund will seek to invest in emerging market countries where economies are developing strongly and in which the markets are becoming more sophisticated. In extreme economic, financial or political conditions the fund, for defensive purposes, may choose to temporarily reduce its emerging market investments below 50% of the fund's value.

Other Information

- Income will be included in the value of your shares.
- The fund may also invest part of its assets in other investments, which seek to generate a similar return to company shares without direct ownership of the company.
- There are higher costs involved in buying and selling shares in this region. These costs reduce the value of your investment but are not included in the Ongoing Charges figure below.

Buying and selling shares

- Investors may buy and sell shares on any Luxembourg business day.

RISK AND REWARD PROFILE

The risk and reward category shown is based on historic data.

- Historic figures are only a guide and may not be a reliable indicator of what may happen in the future.
- As such this category may change in the future.
- The higher the category, the greater the potential reward, but also the greater the risk of losing the investment. Category 1 does not indicate a risk free investment.
- The fund is in this category because it invests in shares of companies from emerging markets and the fund's simulated and/or realised return has experienced high rises and falls historically.
- The fund may be impacted by movements in the exchange rates between the fund's currency and the currencies of the fund's investments.

This rating does not take into account other risk factors which should be considered before investing, these include:

- The fund relies on other parties to fulfill certain services, investments or transactions. If these parties become insolvent, it may expose the fund to financial loss.
- There may be an insufficient number of buyers or sellers which may affect the funds ability to buy or sell securities.
- There are increased risks of investing in emerging markets as political, legal and operational systems may be less developed than in developed markets.

CHARGES

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.75%
Exit charge	0.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	1.95%
------------------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	Not applicable
------------------------	----------------

The entry and exit charges shown are maximum figures. In some cases you might pay less, you can find this out from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges based on the current expense policy of the fund. It excludes almost all costs of dealing in the fund's underlying investments. The UCITS' annual report for each financial year will include detail on the exact charges made. This figure may vary from year to year.

The fund may charge a fee on purchases, sales or switches if it feels other shareholders will suffer as a result of the cost of the transaction. This fee will be retained by the fund for the benefit of all shareholders.

For more information about charges, please see the Charges and Expenses section of the prospectus.

PAST PERFORMANCE

- Past performance is only a guide and does not guarantee future performance.
- Past performance has been calculated after the deduction of ongoing charges, as described above, but not the deduction of entry or exit charges.
- This share class was launched in 1997. The fund was launched in 1993.
- Past performance has been calculated in USD.
