Templeton Shariah Asian Growth Fund

Class A(acc)USD • ISIN LU0792757600 • A sub-fund of Franklin Templeton Shariah Funds
The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

The primary characteristic of a Shariah fund is its compliance with Shariah guidelines based on the principles of Islamic finance. A Shariah fund is required to appoint a Shariah supervisory board which independently ensures that the fund also meets such Shariah guidelines in the management of all of its assets.

Templeton Shariah Asian Growth Fund (the "Fund") aims to increase the value of its investments from Shariah-compliant securities over the medium to long term.

The Fund invests mainly in:

- equity and equity-related securities issued by companies of any size traded on stock exchanges in, located in, or doing significant business in, Asian countries (excluding Australia, New Zealand and Japan), including emerging markets

The Fund can invest to a lesser extent in:

- Shariah-compliant debt securities including Sukuk and Shariah-compliant short-term instruments issued by governments, government-related entities and corporations located in the Asia region (excluding Australia, New Zealand and Japan), including emerging markets

The investment team uses in-depth financial analysis to select individual securities that it believes will provide the best opportunities for increased value

over the long term.

You may request the sale of your shares on any Luxembourg business day.

The income received from the Fund's investments is accumulated with the result of increasing the value of the shares.

For further information on the Objectives and Investment Policy of the Fund, please refer to the section "Fund Information Objectives and Investment Policies" of the current prospectus of Franklin Templeton Shariah Funds.

The benchmark of the Fund is the MSCI AC Asia ex-Japan Islamic Index. The benchmark is indicated for information purposes only, and the Fund manager does not intend to track it. The Fund can deviate from this benchmark.

Terms to Understand

Equity securities: Securities that represent an ownership stake in a company.

Shariah-compliant debt securities: Financial securities that comply with Shariah, such as Sukuk, where the holder owns an undivided exposure over an underlying asset, or Murabaha, where a party buys an asset and agrees upon a sale price with a prospective buyer for an agreed upon profit.

Sukuk: Islamic financial securities similar to bonds that comply with Shariah and where the holder owns an undivided exposure over an underlying asset

Short-term instruments: Shariah-compliant securities with defined terms and a short maturity where, for example, a party buys an asset and then agrees upon a sale price with a prospective buyer for an agreed upon profit.

Emerging markets: Countries whose economy, stock market, political situation and regulatory framework are not fully developed.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

As the share class has no sufficient historical data available, simulated data based on a representative portfolio model or benchmark have been used instead.

Why is the Fund in this specific category?

The Fund invests mainly in Shariah-compliant equity and equity-related securities of companies located in or doing significant business in Asia. Emerging markets have historically been subject to significant price

movements, frequently to a greater extent than equity markets globally. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

Risks materially relevant not adequately captured by the indicator:

Currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

Liquidity risk: the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Reduced liquidity may have a negative impact on the price of the assets.

Emerging markets risk: the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.

Shariah compliance risk: the risk that the restriction to invest only in Shariah-compliant securities may place the Fund at a comparative disadvantage vs. funds that do not have this restriction. Returns to shareholders may also be reduced due to payments to Shariah approved charities to "purify" dividends.

For a full description of all the risks applicable to this Fund, please refer to the section "Risk Considerations" of the current prospectus of Franklin Templeton Shariah Funds.
