The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Pioneer Funds - U.S. High Yield

A Sub-Fund of Pioneer Funds

Management Company: Pioneer Asset Management S.A.

Class A USD Non-Distributing - LU0132198770

Objectives and Investment Policy

Objective Seeks to increase the value of your investment and to provide income over the medium to long term.

Portfolio securities The Sub-Fund invests at least 70% of its assets in below-investment grade U.S. corporate bonds, convertible securities, preferred stocks and mortgage-related and asset-backed securities. The Sub-Fund may also invest up to 30% of its assets in Canadian issuers and up to 15% in issuers from elsewhere in the world, including emerging markets and may also invest in investment grade bonds, cash, money market securities and, on an ancillary basis, in equities. Money Market securities and cash may be included in the calculation of the percentage of the Sub-Fund's assets invested in below-investment grade bonds to the extent they constitute interest due on securities held in the Sub-Fund's portfolio and the value of securities pending settlement. The Sub-Fund may use derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure to various assets, markets or income streams.

Investment process The investment manager uses a combination of market analysis and analysis of individual bond issuers to identify those bonds that appear more creditworthy than their ratings indicate.

Benchmark The Sub-Fund is managed by reference to the BofA Merrill Lynch High Yield Master II index. However, the management of the Sub-Fund is discretionary and the investment manager is not constrained by the composition of the benchmark.

Risk and Reward Profile

What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The Sub-Fund's risk indicator is not guaranteed and may change over time.

The Sub-Fund's risk category reflects the fact that as an asset class, below-investment grade bonds tend to be more volatile than investment grade bonds.

For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.

Terms to Understand

Bonds Securities that represent an obligation to repay a debt, with interest. Mortgage and asset-backed bonds are based pools of consumer debt, such as home mortgages and credit card debt.

Convertible securities Securities that are structured like bonds but have the potential to increase in value if the issuer's stock price goes up.

Derivatives Financial instruments whose value is linked to one or more rates, indices, share prices or other values.

Emerging markets Countries whose securities markets are less established than those of developed countries. Examples include many countries in Africa, Asia, Eastern Europe and South America.

Equities Securities that represent partial ownership of a company.

Recommended for investors who understand the risks of this Sub-Fund and plan to invest for the medium to long term.

This is a non-distributing unit class. Investment income is re-invested. Investors may sell on demand on any business day in Luxembourg.

Additional key risks

The risk indicator reflects market conditions of recent years and may not adequately capture the following additional key risks of the Sub-Fund:

Credit risk The issuers of bonds held by the Sub-Fund may fail to pay principal or interest due. Higher yielding bonds may carry greater credit risk.

Liquidity risk In adverse market conditions, securities that are liquid may become difficult to value, buy or sell, which could affect the Sub-Fund's ability to process redemption requests.

Operational risk Losses may occur due to human error or omission, process errors, system disruptions or external events.

Emerging market risk Some of the countries invested in may carry higher political, legal, economic and liquidity risks than investments in more developed countries.
