# Pioneer Funds - U.S. Mid Cap Value

A Sub-Fund of Pioneer Funds

Management Company: Pioneer Asset Management S.A.

KEY INVESTOR INFORMATION

Class A USD Non-Distributing - LU0133605377

## » Objectives and Investment Policy

**Objective** Seeks to increase the value of your investment over the medium to long term.

**Portfolio securities** The Sub-Fund invests mainly in a broad range of equities of medium-cap companies that are based in, or do most of their business in, the U.S.A. The Sub-Fund may invest up to 25% of its assets, at the time of purchase, in securities of non-US companies. The Sub-Fund defines mid cap companies as those that, at the time of purchase, are within the market capitalisation range of the Russell Midcap Value Index (with the upper end of that range definable either as its current value or its average value for the prior 3-year period). The Sub-Fund may use derivatives to reduce various risks and for efficient portfolio management.

**Investment process** The investment manager uses a “value” style of investing, looking for companies whose stock prices are low relative to other measures of value or business potential.

**Benchmark** The Sub-Fund is managed by reference to the Russell Mid Cap Value index. However, the management of the Sub-Fund is discretionary and the investment manager is not constrained by the composition of the benchmark.

## » Risk and Reward Profile

### What does this risk indicator mean?

The above risk indicator ranks potential risk and reward and is based on medium-term volatility (how sharply the Sub-Fund's actual or estimated unit price has gone up and down over five years). Historical data, such as that used in calculating this synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The Sub-Fund's risk indicator is not guaranteed and may change over time.

The Sub-Fund's risk category reflects the fact that as an asset class, equities tend to be more volatile than money market securities or bonds.

For un-hedged currency classes, exchange rate movements may affect the risk indicator where the currency of the underlying investments differs from the currency of the unit class.

## Terms to Understand

**Capitalisation** Market capitalisation (the total value of all of an issuer's existing shares).

**Derivatives** Financial instruments whose value is linked to one or more rates, indices, share prices or other values.

**Equities** Securities that represent partial ownership of a company.

**Recommended for** investors who understand the risks of this Sub-Fund and plan to invest for the medium to long term.

*This is a non-distributing unit class. Investment income is re-invested. Investors may sell on demand on any business day in Luxembourg.*

## Additional key risks
